Private Sewage Treatment Systems

Properties with septic and other private sewer systems are required to observe other regulations to ensure that their systems are properly maintained, adequately sized, and sufficiently far enough from the home and other improvements. When owners of these properties are contemplating any changes to the footprint of their homes, adding bedrooms in their existing home, or performing certain other improvements, the Hamilton County Public Health Department must inspect the system and approve the plans before Wyoming can approve a permit. If your property is shown above with this designation, please contact the Hamilton County Public Health District at 513-946-7871 to discuss the regulations and the review/approval process.
